

## Jefer Setiawan

Fullstack Developer | Web Developer  
| Laravel & System Design

### Skills

**Backend** Laravel, PHP, REST API, Java (Basic)

**Frontend** Next.js, Vue.js, React.js

**Database** MySQL, PostgreSQL, Eloquent ORM, SQL Optimization

**Tools** Git, Postman, Figma

**Concepts** System Design, API Architecture, MVC

**Language** English (Written & Spoken)

## Biography

Fullstack developer experienced in building end-to-end web applications, internal systems, and automation tools. Skilled in developing scalable digital solutions using modern web technologies, RESTful APIs, and system integration. Comfortable working across the full development lifecycle—from system design and implementation to testing and deployment—focused on delivering reliable, production-ready applications that solve real-world problems.

## Work Experience

### Internship

07/2024 - 12/2024

Software Engineer  
PT Bank Central Asia Tbk. (Tangerang)

- Developed an automation program to digitalize previously manual operational tasks, significantly improving process efficiency.
- Enhanced existing internal applications by adding new features and improving backend logic.
- Contributed to internal system improvements through feature development and system optimization.
- Collaborated with QA engineers for testing and validation of internal systems.
- Worked with internal users to gather requirements and implement functional enhancements.

### Internship

01/2024 - 06/2024

Fullstack Developer  
Focus on Family Indonesia

- Improved and optimized internal CMS using Laravel.
- Refactored legacy code to enhance maintainability and backend performance.
- Implemented new backend features with focus on scalability and system stability.
- Designed and consumed RESTful APIs for internal systems.
- Optimized database queries using Eloquent ORM and raw SQL.

### Freelance Project

03/2023 - 02/2024

Fullstack Developer  
HesedTech (Remote)

- Developed two client web applications: a corporate profile website and a beauty e-commerce platform.
- Built responsive user interfaces using Vue.js within a Laravel environment.
- Translated Figma designs into functional and reusable UI components.
- Integrated frontend components with RESTful APIs from the backend.
- Developed reusable components and ensured cross-browser compatibility.
- Collaborated with team members throughout the full development lifecycle from design to deployment.

## Education

08/2021 - 09/2025

Computer Science (B.Sc.)

GPA - 3.68

Universitas Multimedia Nusantara

*Software Engineering* ▪ *Web Development*

Bachelor's thesis: „Pengembangan Modul U-Tapis: Sistem Deteksi Hujatan Menggunakan Support Vector Machine“.

## Interests

- ▶ Bassist
- ▶ Fitness
- ▶ Cooking
- ▶ Cinematography

## Personal Project

### Personal Project

Moses System  
Fullstack Scheduling Platform

2025

- Developed a fullstack scheduling platform for managing church service assignments.
- Built scalable backend services using Golang.
- Designed RESTful APIs for scheduling operations and data flow.
- Implemented scheduling logic and service orchestration workflows.
- Integrated frontend and backend systems for full operational usage.

## Organization

- (12/2023 - 11/2024) First Secretary and Treasurer At Himpunan Mahasiswa Informatika Universitas Multimedia Nusantara
- (12/2022 - 11/2023) Second Secretary and Treasurer At Himpunan Mahasiswa Informatika Universitas Multimedia Nusantara

11th February 2026
